message canada all those still suffering: Be assured that recovery does happen. Make sure you drink plenty of water, juice and broth to rehydrate yourself and replace the electrolytes your body has lost.

If it was given to your for a gum infection then I would say take it, but if not you should see your dentist or at least call and ask if you can take the amoxicillin for the gum infection or if you should be seen by the dentist first. Regardless of how you get the drug, it is evil. Get some micronutrients and you will start feeling better within a month.
